T H E P A S S I N G Y E A R

This first page, I like to reserve for a more or less personal talk, so we can tell you some of the things we are trying to do. First in importance I think, comes

SORTING OUT THE HARDY AZALEAS.

We now have over 550 varieties of Azaleas in 10 groups, and the confusion can well be imagined. We are working to try to evaluate and bring to the top the "cream" of them all. Our evaluation is based on:--

1. HARDINESS.

This is of paramount importance. We feel that both the Gable and Kaempferi hybrids can be grown over a wider area, for both have successfully overwintered at temperatures of 28° F. below zero. To simplify things we are altering our method of recording hardiness to that used by the American Rhododendron Society. The ratings are based upon minimum temperatures which varieties may be expected to stand with no appreciable damage to leaf, stem or bud. They are as follows:

H-1..(Hardy to 25° F. below zero)	H-3..(Hardy to 5° F. below zero)
H-2..(Hardy to 15° F. below zero)	H-4..(Hardy to 5° F. above zero)

These ratings refer to established mature plants. Young stock should be rated one lower than is shown for their first year.

2. COLOR AND FORM.

Here is where the main confusion lies, for in each group there is duplication upon duplication until the average grower can, with reason, give up and just stick to Hinodegiri. We think the BEST from all groups should be known and grown. We hope to tell you what we think are best but it's going to take a lot of work and time. Recorded on the Horticultural Color Chart. (See HCC numbers).

3. HORTICULTURAL MERIT. X Low. XXXX High.

This rather loose term covers a multitude of sins-- habit and speed of growth, size, color and quantity of bloom, ease of propagation, and general all-round reliability. In fact, horticultural merit covers all the characteristics which make up the plant in question. If a plant does not measure up on any of these points, then it is discarded in favor of one that does.

This same process of selection is also being applied to Rhododendrons but here, of necessity, results will be even slower.

CONTROLLED HUMIDIFICATION.

You may have read reference to our experiments with this in the American Nurseryman. We have been so completely sold on the idea that 5 of our houses are now fitted with overhead fog lines. We believe that quantity and quality of our propagation will be substantially increased. Our aim in this, and in all that we do, is to produce better plants of the right kind, AND AT AN ECONOMICAL FIGURE.

We think we have some fairly nice stock to offer this season and we would welcome an opportunity to show it to you. An open invitation is extended to come see us. If you cannot come, then write for information which will be gladly given either by letter or call from our salesman.

G R A F T E D J A P A N E S E M A P L E S

ACER PALMATUM ATROPURPUREUM NOVUM. GRAFTS.

We gladly continue our unconditional guarantee of all the Bloodleaf maples which we offer for sale. Any plants which do not retain their deep color to your entire satisfaction throughout the summer will be replaced without charge.

Instead of recording stocks by size, we are changing to grades. Generally the grades will correspond to previous sizes but a solid, well developed plant may be put into the larger grade.

COLOR: Large, mature leaves ... HCC-1030, Maroon.
 Young leaves HCC-827, Ruby Red.
HARDINESS: H-1 to H-2

Strong one year grafts, grown in open beds.

Per 100

GRADE 2. T BR (Approximately 10-12") ..	\$100.00
GRADE 1. T BR (Approximately 12-15") ..	125.00

Two year, bed grown.

GRADE 2. TT BR (Approximately 12-18") .	150.00
GRADE 1. TT BR (Approximately 15-18") .	175.00

GRADE 1, One year.

GRADE 1, Two year.

J O S E P H G A B L E ' S H Y B R I D A Z A L E A S

Our original evaluation of Mr. Gable's splendid Azaleas has been amply justified this past season. A rather treacherous winter killed outright some of the more tender varieties we are testing, but all of Mr. Gable's came through without any damage whatsoever. This proven hardiness plus their great ornamental value makes this group of Azaleas truly outstanding in every way.

Mr. Gable has concentrated upon the production of semi-double and fully double flowering hybrids and has already introduced a number of varieties which we believe will quickly take their place at the head of the list. His contention is that these double forms, by losing none of their vitality in seed production are more healthy, vigorous and free flowering and certainly such gems as Louise Gable and Rosebud leave nothing to be desired.

We have decided to propagate in quantity this wonderful group of plants, and we felt that it was only right to ask Mr. Gable if he would assist us in evaluating his own varieties so we could offer a steadily increasing group under his personal stamp of approval. We are very glad to say that Mr. Gable has agreed to cooperate with us in this way, and therefore all varieties which we offer now and in the future will first be evaluated by Mr. Gable. We shall make no statements about any of the varieties nor shall we offer any without his prior agreement. Those of you who know Mr. Gable's work will realize that his evaluations will be conservative rather than exaggerated, and anything that he calls good will indeed be just that. His nursery is situated 900 ft. above sea level in Pennsylvania and many varieties which he records as not too hardy there have proven to be completely hardy with us. Mr. Gable agrees that many varieties which he has not developed because of their tendency to freeze with him, may well be grown by other growers in more favorable areas. These variations in relative hardiness are carefully recorded below:

The so-called "super hardy" types, of which the variety HERBERT is an excellent example, can, we believe, be grown over a much wider area than was previously supposed including the mid-west, and a small scale trial would certainly be justified in any area. Some confusion has arisen as to name and numbers on some varieties and we are checking with the original stocks so that we can be certain they are true to name.

Mr. Gable is continuing his work of hybridizing and we can look forward to more outstanding Azaleas in the future. We have just over 50 numbers on trial now at our nursery, many of which we believe will prove to be a real advance on anything yet seen. Under Mr. Gable's skilled guidance we hope to select from these each year and offer a steadily increasing list of truly outstanding Azaleas.

P L E A S E N O T E

THE HARDINESS RATING IS THAT GIVEN BY MR. GABLE AS APPLYING AT HIS NURSERY IN STEWARTSTOWN, PENNSYLVANIA.

J O S E P H G A B L E ' S H A R D Y H Y B R I D A Z A L E A S

Our list is short because on many other first-class varieties we are holding stocks for propagation. We expect to add NEW selections each year.

CLARET. XXX

No winter damage has been recorded here for the past three seasons. Very attractive in bud with the dark buds held erect. When open, the single flowers completely cover the plant. Very hardy.

COLOR: HCC-025/2 SPIREA RED
HARDINESS: H-1

6- 8" B&B 2 yr. Bed grown EACH \$1.25
8-10" B&B 2 yr. Bed grown EACH \$1.50

ETHELWYN. XXX

We are continuing to grow this variety but believe it will be superseded by Isabel. Completely hardy with us in New Jersey but Mr. Gable reports not hardy with him. Single flowers.

COLOR: HCC-527/1 RHODAMINE PINK
HARDINESS: H-2 to H-3

4- 6" B&B 2 yr. Bed grown EACH \$1.00
6- 8" B&B 2 yr. Bed grown EACH \$1.25
8-10" B&B 2 yr. Bed grown EACH \$1.50

ISABEL. XXX

Hose in hose flowers produced on a compact plant. Completely hardy here but not hardy with Mr. Gable. It should replace Coral Bells.

COLOR: HCC-23/2 ROSE MADDER
HARDINESS: H-3

HERBERT. XXX

One of the best and hardiest of Mr. Gable's hybrids. Mr. Gable's own evaluation is "super hardy". Reports from Ohio and other areas confirm this. Large flowers, somewhat frilled, of clear Cyclamen Purple.

COLOR: HCC-30 CYCLAMEN PURPLE
HARDINESS: H-1 plus

LOUISE GABLE.

Believed by many to be the finest hybrid Mr. Gable has yet produced. Rated as completely hardy by Mr. Gable, the plants have an upright form and are covered in late May with large semi-double flowers of a deep salmon pink. Reflexed petals have fine satin-like texture.

COLOR: HCC-623/2 NEYRON ROSE
HARDINESS: H-1

ROSEBUD. XXXX

We are convinced that this Azalea is one of the outstanding commercial varieties of the future. It is not often that one can say of any plant that it has everything but here indeed is one to which this description applies. It has a somewhat dwarf and slow growing habit, with tight, compact growth, dark healthy green leaves, somewhat smaller and longer in shape than Hinodegiri. The flowers slowly open over a period of 2 to 3 weeks, are particularly attractive in the early stage when they exactly resemble tightly furled miniature pink roses. When fully open, they are double and have the same satin-like texture as Louise Gable. Rosebud is completely hardy. The original stock plant on Mr. Gable's nursery, now 20 years old, has come through winters registering 28° below zero without damage. We have no hesitation in recommending growers in all parts of the country to try a few plants, for it is one of the most charming--and salable--Azaleas yet seen.

COLOR: HCC-625/2 PHLOX PINK
HARDINESS: H-1 plus

	Per 100
Spring liners	\$ 35.00
3- 4" B&B 1 yr. Bed grown	75.00

ROSE GREELY. XXX

Mr. Gable has been trying for some time to produce a really hardy dwarf white Azalea. From a block of some 250 second generation crosses, Mr. Gable has selected the variety Rose Greely and it would appear to fulfill the many exacting requirements Mr. Gable demands of his new introductions.

COLOR: PURE WHITE
HARDINESS: H-1

PRICES:--GABLE SPRING LINERS, offered for May 1, 1952.

All the ABOVE GABLE hybrids are offered for spring 1952 delivery (excepting Rosebud which is quoted separately), individually wrapped for shipment by express. B&B stock when available, is quoted under the variety. 30.00

A number of GABLE SEEDLINGS are distributed, many without name. Most have been discarded by Mr. Gable because they are not hardy and we see no reason to continue propagation of these. Some are proving entirely successful in certain areas and growers who find them so, will no doubt continue propagation, but to have the records straight, we list the varieties which have been discarded by Mr. Gable: BILLY--BOUDOIR--CAMEO--CAMEROON--CHARLOTTE--CHEROKEE--CORSAGE--ELIZABETH GABLE--GABLE'S SCARLET--H. W. ANDERSON--IRIQUOIS--LA PREMIER--LA ROCHE--OLD FAITHFUL--PYXIE--ROYALTY--SUSAN--SWAN--WHITE STAR--19G--46G--51G--75G--76G--85G--126G--130G--132G--135G--142G--152G--168G--221G--C3G--F12G--and 07G.

G L E N N D A L E H Y B R I D A Z A L E A S

With the long list now distributed, we have felt it right at this time to offer only outstanding varieties which have proven hardy with us here. We have almost all the Glenn Dale varieties on test here and if you are interested in any particular variety not shown, we could no doubt supply a few plants. The hardiness rating is ours.

PRICES:--GLENN DALE SPRING LINERS, for May 1, 1952.
All the following GLENN DALE hybrids are offered for Spring 1952 delivery, individually wrapped for shipment by express. B&B stock when available, is quoted under the variety.

Per 100
\$30.00

BEACON. XXX

Erect growth. Flowers 2 to 3 in head, 1 3/4" across, almost pure Porcelain Rose but garden effect nearly Scarlet. Does not sunburn.

COLOR: HCC-620 PORCELAIN ROSE
HARDINESS: H-3 to H-4

BUCCANEER. XXX

Erect. Flowers 2 to 4 in head, freely produced, 2" across. Brilliant orange red with dark tone on upper lobe. Sunburns in the open.

COLOR: HCC-20/1 GERANIUM LAKE
HARDINESS: H-4

CARNIVAL. XXXX

Vigorous, upright, with fine evergreen foliage. Flowers usually 2 to 3 in head, 3 1/2"-4" across, color salmon with orange undertone. Heavy dull red blotch on upper lobe.

COLOR: HCC-021/1 CLARET ROSE
HARDINESS: H-2 to H-3

4- 6" B&B 2 yr. Bed grown EACH \$.75
6- 8" B&B 2 yr. Bed grown EACH \$1.00

FASHION. XXXX

Erect. Leaves small, glossy, dark green. Flowers usually 2 to 4 in head, 2" across, almost perfect hose in hose. An outstanding success here.

COLOR: HCC-021/1 CLARET ROSE
HARDINESS: H-2 to H-3

GAIETY. XXX

Erect to broad spreading to 5 feet. Leaves narrow, dark green. Flowers usually 1 to 3 in head, very freely produced. Conspicuous blotch of rose red on upper lobes. It is in effect a late Kaempferi Fedora, flowering 2 to 3 weeks later.

COLOR: HCC-627 FUCHSINE PINK
HARDINESS: H-2 to H-3

GREETING. XXXX

Compact habit. Leaves dark green. Flowers usually 1 to 2 in head, very freely produced, 1 3/4"-2" across, margins of lobes ruffled.

COLOR: HCC-021/1 CLARET ROSE
HARDINESS: H-2 to H-3

JEANNIN. XX

Bush habit. Spreading rather than upright, densely twiggy. Leaves medium to dark green. Flowers 1 to 3 in head, heads clustered, freely produced, 1 3/4"-2" across.

COLOR: HCC-24/1 TYRIAN ROSE
HARDINESS: H-2 to H-3

8-10" B&B 2 yr. Bed grown EACH \$1.25

A TYPICAL AZALEA LINER---VARIETY HINODEGIRI.

JUBILANT. XXX

Bush habit, dense, twiggy. Leaves dark green, narrow, glossy. Flowers 2 to 4 in head, usually massed 1 1/2"-1 3/4" across, hose in hose, striking salmon pink color.

COLOR: HCC-724 ROSE RED
HARDINESS: H-3

MELANIE. XXXX

Upright, spreading to finally over-arching habit. Leaves dark green. Flowers hose in hose. 1 1/2" across, freely produced.

COLOR: HCC-021/1 CLARET ROSE
HARDINESS: H-3

REMEMBRANCE. XXX

Erect to broad spreading to 5 feet. Leaves narrow, dark green. Flowers usually 1 to 3 in head, freely produced, and of outstanding size 3" or more across.

COLOR: HCC-021/1 CLARET ROSE
HARDINESS: H-4

ROSETTE. XXXX

An excellent variety. No winter damage to foliage or flowers. Flowers exceptionally large. 4" across, semi-double; sometimes double. One of the best of the group.

COLOR: HCC-29/1 RHODAMINE PURPLE
HARDINESS: H-2

6- 8" B&B 2 yr. Bed grown EACH \$1.00
8-10" B&B 2 yr. Bed grown EACH \$1.25

SOUVENIR. XXXX

Erect. Fine dark green foliage. Flowers 2 to 4 in head, 1 1/4" across, irregularly hose in hose.

COLOR: HCC-0621 EMPIRE ROSE
HARDINESS: H-2

8-10" B&B 2 yr. Bed grown EACH \$1.25

TREASURE. XXX

Vigorous. Heavy, dark leaves. Flowers usually 2 to 3 in head, 3 1/2"-4 1/2" across. This variety has proven entirely hardy here up to the present. Last season it came through without any winter damage when practically all our Ledifolia Alba were killed.

COLOR: PURE WHITE
HARDINESS: H-3

8-10" B&B 2 yr. Bed grown EACH \$1.25

WINNER. XXX

Habit dense, spreading. Leaves small, dark green, and shining. Flowers 1 to 3 in head, heads often grouped, freely produced, 1 3/4"-2" across. Although the color is slightly different on the Color Chart, the effect of this variety is a later flowering Hinodegiri. Large plants here in full bloom on May 22nd this year.

COLOR: HCC-26/1 SOLFERINO PURPLE
HARDINESS: H-2

PRICES:--GLENN DALE SPRING LINERS, for May 1, 1952.

All the ABOVE GLENN DALE hybrids are offered for Spring 1952 delivery, individually wrapped for shipment by express. B&B stock when available is quoted under the variety.

KAEMPFER FEDORA, 18-24" B&B 4 yr. PHOTOGRAPHED AUGUST 16, 1951.

E X T R A H A R D Y K A E M P F E R I H Y B R I D A Z A L E A S

From our collection of 35 named Kaempferi hybrids, we offer below a selected list of what we believe are the best varieties. All have proven first-class growers, completely hardy and we believe that if your mid-winter temperature does not exceed 25° below zero, you should give them a trial. Small plants may need protection for the first season in extremely cold areas but once established, they should develop without trouble.

ALICE. XXX

Per 100

One of the newer Kaempferi hybrids. Large flowers with a very distinct dark blotch which gives an over-all effect of a darker color. A first-class variety.

COLOR: HCC-622 CAMELLIA ROSE
HARDINESS: H-1 to H-2

Spring liners \$ 30.00

FEDORA. XXXX

An outstanding variety of proven merit. Exceptionally large flowers, nearly twice the size of Cleopatra. Unusually hardy with a vigorous, open habit. Very good clear color.

COLOR: HCC-625 PHLOX PINK
HARDINESS: H-1 plus

Spring liners	20.00
9-12" B&B 2 yr. Bed grown	80.00
12-15" B&B 2 yr. Bed grown	100.00

OUR BEDS OF KAEMPFERI HYBRIDS. PHOTOGRAPHED AUGUST 15th, 1951.

D W A R F K U R U M E H Y B R I D A Z A L E A S

We are discarding some varieties which have proven not hardy with us, notably Coral Bells, Flame and Pink Pearl. We do not intend to propagate any more of these but will have even better varieties to replace them before long from the wide selection available in other Azalea groups.

AMOENA COCCINEA. XXXX

Per 100

Many growers dislike the bright purple of Amoena but would be charmed and pleased by the soft, yet deep pink of the true Amoena Coccinea. Occasional branches may revert to type but if these are cut out the plant will keep true.

COLOR: HCC-25/1 ROSE BENGAL
HARDINESS: H-1 plus

Spring liners \$ 20.00

CORAL BELLS.

Discontinued because it has not proven reliably hardy here. We expect that Gable's Isabel will replace or possibly the USDA hybrid Guy Yerkes. Listed to show the B&B sizes which are available.

3- 6" B&B 1 yr. Bed grown	35.00
4- 6" B&B 2 yr. Bed grown	55.00
6- 8" B&B 2 yr. Bed grown	75.00
15-18" B&B Large specimen plants .EACH--	3.50

DOUBLE HINODEGIRI. XXXX

In our tests this variety has come out close to the top. It has all the advantages of bright glossy green foliage, compact yet vigorous habit of the Hinodegiri but with large hose in hose flowers slightly paler in color. We are propagating in quantity.

COLOR: HCC-623 NEYRON ROSE
HARDINESS: H-4

Spring liners 20.00

PLEASE NOTE!

PRICES ON ALL AZALEAS ARE FOR SPRING DELIVERY FOR CAREFULLY GRADED PLANTS WHICH HAVE BEEN LIFTED IN THE FALL AND OVERWINTERED UNDER PROTECTION.

IF YOU ARE ABLE TO TAKE DELIVERY OF YOUR SPRING REQUIREMENTS IN THE FALL A REDUCTION OF \$.05 PER PLANT IS GLADLY GIVEN.

OUR BEDS OF TWO YEAR AZALEA HINODEGIRI. PHOTOGRAPHED AUGUST 10th.

This is the variety which everyone knows as "that dwarf red Azalea". It is not truly red--only Mrs. Addy Wery has that distinction--but Hinodegiri is the variety which at present sells 10 to 1 against all others. We have a really fine block of clean, vigorous two year old stock and can make immediate shipment of material which we know will give you and your customers every satisfaction.

AZALEA MRS. ADDY WERY RECEIVES AN AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY

We give hereunder the complete notation from the Journal of the Royal Horticultural Society, England, issue of October, 1950.

RHODODENDRON TRIALS, 1950

"Rhododendron (Azalea) Addy Wery. (Malvatica x Flame). AWARD OF MERIT. May 5, 1950.

Of compact, dwarf, very free flowering habit, evergreen with one or two open funnel-shaped flowers in a truss. The corolla 1 3/4" diameter, the five petals Blood Red (HCC-820/2) on Orient Red (HCC-819/2) with a dull orange-bronze flush."

It is hardly necessary for us to add anything to the RHS citation beyond saying that this Azalea has now been on test here for four seasons and has proven comparable to Hinodegiri, in hardiness, in vigor of growth, and in general all-round excellence, We said last year and we gladly repeat...

"THIS IS A PLANT OF RARE PERFECTION".

FOR SIZES AND PRICES, SEE NEXT PAGE----

AZALEA MRS. ADDY WERY.Per 100

We are propagating in large quantities and are glad to offer plants in larger sizes and at somewhat more reasonable prices.

HARDY HYBRID RHODODENDRON ROSEUM ELEGANS

RHODODENDRON ROSEUM ELEGANS. A TYPICAL FLOWER TRUSS.

Growers from all parts of the country who have received plants of this Rhododendron from us in the past two seasons, are returning regularly with increased orders. Here's what a grower from Media said last week ("My nursery stock I got from you last spring was certainly fine--I've seen none better."); and he is one of many. We repeat what we said last year, that this is, in our opinion, the best stock in Rhododendrons for the average nurseryman to carry.

In every sense, a moneymaker-----NEED WE SAY MORE?

Truss 4" across, 4" wide. Flowers 1-3/4" wide.

COLOR: HCC-630/2 MALLOW PURPLE

HARDINESS: H-1

ROSEUM ELEGANS. XXX

A few reasons why we like this variety so well.

1. IT IS COMPLETELY HARDY.
2. IT IS NOT A "DIFFICULT" GROWER. IT DOES WELL.
3. ITS HABIT IS GOOD. ROUND, COMPACT, SALABLE.
4. IT IS NOT SUBJECT TO CHLOROSIS. LEAF COLOR IS GOOD.
5. IT BUDS WELL AND FLOWERS REGULARLY.
6. IT DOES NOT CLASH. THE COLOR IS CLEAR.
7. IT PROPAGATES FROM STEM CUTTINGS.
8. IT-----

BUT we could go on all day. Why not try a few plants yourself. You will quickly understand what we mean.

If you have been used to growing
grafted plants of this first-class hybrid
Rhododendron, you will be astonished
at the increased vigor and all-round
excellence of plants on their own
roots.

See page 26, for our story on
**THE PRODUCTION OF A MONEY
MAKER.**
